National Stability Society

National Stability Society (NSS), Press Release about the National Identity issue, in the Electronic National Identification card known as "Tazkira", and the recommended change in the concern department. (Aug 3, 2016)

As we know that some anti-state elements are busy in a propaganda in order to abolish the words "Afghan" from the Electronic ID cards which is the dire contempt of the article "4" of the Afghan constitution. As we already seen that people belonging from different provinces of Afghanistan have strongly protested and condemn all those who want to eliminate the word " Afghan" from the Electronic ID cards.

Due to the mounting people pressure the honorable president already made that promise that he will solve the issue of National Identity in the Electronic National Identification card forever but unfortunately the issue is still remain on place. Apart from this promise he also made the pledge that he will bring deep structural changes in the concern department for the better performance and governance.

But regrettably still we are receiving the information that still the issue of Electronic ID cards not solve according to the people expectation. Still some anti-state elements wants to sabotage the whole process and want to eliminate the word "Afghan" from the Electronic National ID cards.

National Stability Society (NSS) put strong demands to the government to solve urgently the issue of National Identity in the Electronic National Identification card known as "Tazkira" on a priority bases according to that previous promise. We also demands from the government to bring structural reforms in the concern department for the better performance.

If still the government is not taking the issue seriously then the consequences will be more drastic in these already fragile situations.
